CLEVELAND LAUNCHES easyDial™ DIGITAL CONTROL FOR TILTING KETTLES AND T1 SERIES TILT SKILLETS

New control features additional cooking functions and self-diagnostic read-out

New Port Richey, FL. – February 7, 2019 – Cleveland Range, a leading Welbilt brand for commercial steam cooking equipment, announces the launch of its new easyDial™ digital control for T1 Series tilt skillets and self-contained tilting kettles.

The new easyDial™, an intuitive, easy to use control interface with illuminated LED Control Knob, was designed to complement the Convotherm C4 easyDial™ controls. The control displays both temperature and time and has three Cook settings consisting of: Cook - Simmer, Cook - Continuous Cook, Cook – Off. An optional Core Temperature and Sous Vide Probe is available as an additional accessory.

easyDial™ also features a self-diagnostics button for an automatic start of the 6-point self-diagnostics process that displays directly onto the control screen. This new feature quickly and correctly identifies equipment malfunctions, greatly reduces downtime and allows for first-time fix, eliminating incorrect diagnosis by repair technicians.

easyDial™ will also be available as an option on Cleveland's T1 series PowerPan tilt skillets and self-contained gas and electric tilting kettles.

To learn more about the Cleveland's easyDial™ controls, visit our Welbilt booth 3200 during the NAFEM Show, Feb 7-9, 2019, or visit www.ClevelandRange.com.
