

INSTALLATION INSTRUCTION

for

36' & 42" BOILER BASES
WATER INLET CONVERSION KIT
PART No. FK109196REV B-E & FK109205REV B-F 36 42

REBUILT DRAIN MANIFOLD ASSEMBLY

- 12 > Remove the flush valve with the hoses 1, 3 & conduit with wiring inside the electric box (circle D in Figure 1) and do not use any more. Install the snap-in plug supplied with the kit in the hole on the electric control box where the conduit with wiring inside was removed.
- 13 > Referring to Figure 4 circle A & B, connect the 1/4" water hose 2 removed in step 5 to the hose barb fitting on the generator water inlet installed in step 10 and to the fitting connection reinstalled in step 7. The hose has to be cut to allow fitting without kinking.
- 14 > Tighten all hose clamps, do not over tighten.
- 15 > Continue with the reassembly of the unit.
