Cleveland

Steam That Actually Moves.

Same category, different engineering. SteamChef is built to cook more evenly, adjust more precisely and clean up more simply than the boilerless steamer it is up against.

The most complete steam line across every steam segment.

If the other guy makes it, we have a match. One brand, whatever the site needs.

SIDE BY SIDE

Cleveland vs. The Other Guy

	CLEVELAND	THE OTHER GUY
STEAM DELIVERY · ALL STEAMCHEF **FORCED CONVECTION** Steam driven into every pan, not natural stale convection.	✓	✗
CONTROLS · ALL STEAMCHEF **SET AT THE FRONT PANEL** No plate or nut to turn inside a hot cavity.	✓	✗
PRECISION · 22CET6.2 **HOLDS WITHIN ±1°F** Exact holding temps from 140°F, not three preset modes.	✓	✗
WATER · ALL STEAMCHEF **OPEN DRAIN, ALWAYS CLEAN WATER** Purges condensate and solids, never recycles water, even on the 22CCT6.	✓	✗
DRAIN · ALL STEAMCHEF **AUTOMATIC TEMPERED DRAIN** Drains itself at 120°F, where the other guy's runs 195°F, with no knob to wait on.	✓	✗
SANITATION · ALL STEAMCHEF **PATENTED KLEANSHIELD** No flavor transfer between pans, no reservoir contamination.	✓	✗
DOOR · ALL STEAMCHEF **COOL-TOUCH DOOR** Stays 85°F on the outside, while the other guy's door can reach 150°F.	✓	✗
RACKS · ALL STEAMCHEF **REVERSIBLE RACKS** Flip and change pan racks in seconds.	✓	✗

Plus: no water filter required on any boilerless SteamChef, with filtration recommended for best results.
